PROFILE

Senior full-stack developer with 7+ years building automation, middleware, and API integrations — from HIPAA-compliant clinical systems to an order pipeline that has processed 3.7 million orders since 2024. Eight production systems shipped and five CRM platforms integrated across fulfillment, healthcare, and e-commerce. Deep in Laravel and PHP, equally comfortable in Django, React, and React Native, and used to owning a system from architecture through AWS deployment and support.

TECHNICAL SKILLS

Backend · PHP, Laravel, Python, Django, Node.js, REST APIs, Microservices

Frontend · React, TypeScript, JavaScript, AngularJS, UI/UX Design

Mobile · React Native, Flutter

Data & Infrastructure · MySQL, PostgreSQL, Redis, AWS

Platforms & Integrations · Shopify Admin API, WordPress, Shopware, WMS / 3PL systems, CRM middleware, SEO

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer

Independent · *[Start – Present]*

- Design and deliver client products end to end — requirements, architecture, implementation, AWS deployment, and ongoing support.
- Built Chartsuite, a SOC 2– and HIPAA-compliant patient information system for a wound care clinic, on Laravel, MySQL, Redis, and AWS.
- Shipped budgeting tools, e-commerce builds, and bespoke internal systems across Laravel and Django.

Senior Full-Stack Developer

Fullstack Fulfillment · *Florida, USA (Remote)*

- Engineered the order-automation platform behind 3.7 million processed orders since 2024 — microservices that pull orders from third-party CRM APIs and sync them in real time to WMS and 3PL systems.
- Integrated five separate CRM platforms into fulfillment through purpose-built middleware, with customer matching and order consolidation into single shipments.
- Built Shopify fulfillment middleware on the Shopify Admin API, de-duplicating orders across five upstream CRM sources.
- Replaced manual Excel-based product profiling with a fully automated web workflow, removing a recurring source of error and delay.

Full-Stack Developer

Kunsloft — Boost Internet GmbH ·

- Maintained and extended Yii2 backend applications in production.
- Built Shopware consent popups and improved site performance across client properties.
- Developed WordPress interfaces with Elementor to client design specifications.

Junior Full-Stack Developer

Growsari

- Built warehouse-management backend features including zone picking, scheduled cron jobs, and CBM (volumetric) calculations.
- Implemented AngularJS interfaces from Figma designs and extended REST API endpoints.
- Instrumented GA4 tracking for product analytics.

Software Engineer (Contract)

Pasabuy.App

- Developed custom WordPress plugins for transactional email, a product REST API, and token-based authentication.
- Built the Laravel 5 backend powering the platform.
- Shipped a React Native mobile app with an integrated wallet system to both the App Store and Google Play.

SELECTED PROJECTS

Chartsuite — Patient information system for a wound care clinic; SOC 2 and HIPAA compliant, deployed on AWS.

Laravel · MySQL · Redis · AWS

Order Management System — Middleware that ingests orders from third-party CRMs, matches customers, and merges them into single shipments. 3.7M orders processed since 2024.

Django · PostgreSQL

Beritledger — Budget management platform for freelancers and church giving, aimed at helping church-connected freelancers grow their startups.

Laravel · MySQL

Bible Reading Guide — Cross-platform mobile app with a 365-day reading plan, notes, and guided onboarding for new believers.

React Native · RevenueCat · Laravel
