SUMMARY

Dynamic Senior Full-Stack Web Developer with over 6 years of experience in creating robust web solutions. Proficient in automation, microservices, and API integrations with a strong focus on enhancing operational efficiency. Achievements include optimizing real-time order synchronization processes and transforming manual tasks into automated systems. Ready to leverage expertise in full-stack development to drive innovative solutions and achieve exceptional results.

WORK EXPERIENCE

Senior Full Stack Developer, Fullstack Fulfillment, Florida

- Engineered automation solutions to extract orders from third-party APIs and efficiently transmit them to WMS and 3PL sites via an integration manager.
- Guaranteed real-time order synchronization and accuracy across disparate platforms.
- Developed microservices to facilitate seamless order synchronization from external APIs to 3PL software.
- Configured customer accounts, product fulfillment details, and associated data to ensure efficient order processing.
- Managed and maintained comprehensive product catalogs and fulfillment rules.
- Delivered troubleshooting and technical support for order-related challenges.
- Collaborated closely with internal teams and external partners to rectify integration errors and streamline system inefficiencies.
- Transitioned manual Excel-based product profiling into a fully automated web-based process.
- Instituted automation tools to minimize manual data entry and enhance processing speed.

Full Stack Developer, Kunsloft - Boost Internet GmbH,

- Resolved feature bugs and optimized website performance.
- Sustained backend applications utilizing the Yii2 PHP Framework.
- Designed and implemented custom popups for cookie and analytics consent using Shopware PHP.
- Maintained and crafted WordPress UI designs using Elementor and Pro.

Junior Full Stack Developer, Growsari,

- Developed backend features to enhance warehouse management and reduce picking time (e.g., Zone Picking, Cron Jobs, CBM, etc.).
- Maintained and created user interfaces for new backend features using AngularJS and JavaScript based on provided Figma designs.
- Sustained REST APIs while implementing enhancements.
- Integrated Google Analytics 4 to track user activity on the Report Issues form using Google Tag Manager.
- Facilitated API communication between backend applications.

Software Engineer (Contract), Pasabuy.App,

- Developed WordPress plugins, including Mailpress for email notification, Tindapress for product management via REST API, and DataVice for user information management and authentication using tokens.
- Enhanced search engine optimization (SEO) for WordPress.
- Participated in the design of a mobile application utilizing Xamarin C#.
- Created a backend system using Laravel 5 with REST API, employing the AdminLTE plugin and Bootstrap 4 for the user interface.
- Deployed a React Native application to both Google Play and the App Store.
- Established a wallet system allowing users to fund their accounts and manage delivery orders.

Software Developer, Government Internship Program (GIP) PESO,

- Developed an inventory system for managing supplies effectively.
- Implemented a CRUD system using PHP, HTML, Bootstrap, and CSS for employee complaints.

Freelance Work, ,

- Provided support and development for e-commerce websites using Laravel Framework 10-11.
- Created an e-commerce platform using Shopify.
- Developed a library management system using Laravel 5, Bootstrap 4, and the AdminLTE plugin.
- Engineered a patient monitoring system using Laravel 5, Bootstrap 4, and the AdminLTE plugin.
- Designed a WordPress e-commerce site called 'Pastries'.
- Produced website copy utilizing WordPress and Elementor (for practice only).

Graphics and Video Editor, ,

- Created promotional graphics for church social media pages and events.
- Produced engaging idle videos for various occasions.
- Edited highlight videos for anniversaries and organizational events.
- Generated video content for station IDs including videography and editing.
- Developed instrumental videos incorporating lyrics.
- Crafted videos featuring short testimonies, which included both videography and editing.
- Applied advanced video editing and graphic design using Adobe Premiere Pro, Adobe Photoshop, DaVinci Resolve, CapCut, and Canva.
